EXPERIENCE

Mifiel: Full stack web developer

APRIL 2023 - PRESENT - HOME OFFICE

My professional background revolves around analyzing, developing, and supporting enterprise systems, as well as proposing solutions to client issues and requests for new functionalities. Confronting unfamiliar technologies has been a consistent aspect of my career, highlighting my ability to learn Ruby on Rails and overcome its steep learning curve. Moreover, I've focused on enhancing solution analysis by implementing development best practices and design patterns to optimize code architecture, guided by my leaders and collaborative team.

Loft: Tech lead / frontend senior

DECEMBER 2021 - MAY 2023 - HOME OFFICE

I lead equipment, I ensure software quality as much as possible, I implement improvements for the performance of the site and good development practices. I interview future developers, and I understand the business rules for decision making.

Listo: Full Stack Developer

NOVEMBER 2020 - DECEMBER 2021 - HOME OFFICE

Provide support to users, fix bugs, design, develop and test new modules for the platform, also generate reports and analysis of fiscal documents such as invoices and bank statements with regular expressions.

Project Smart Gloves: Founder

JANUARY 2017 - DECEMBER 2019

I built a pair of gloves with sensors that use artificial intelligence to classify the sign language of deaf people.
